

# 6610C Series Single-Output, 40-50 W GPIB Power Supplies

Data Sheet

Speed and accuracy for test optimization

- Small, compact size for bench and system use
- Fast, low-noise outputs
- Dual-range, precision low current measurement
- Built-in measurements and advanced programmable features
- Protection features to ensure DUT safety

This series of linear-regulated 40-50 W DC power supplies is designed to maximize the throughput of DUTs through the manufacturing test process with fast programming and measurement, and also active downprogramming. It offers many advanced programmable features including stored states and status reporting. Programming is done using industry standard SCPI commands via the GPIB or RS-232. Test system integration is further simplified by using the *VXIplug&play* drivers. The optional relays simplify system design and troubleshooting.

The half-rack size of the 6610C series makes it a convenient DC power supply for the R&D lab bench. The built-in microamp measurement system helps the engineer to easily and accurately monitor the output voltage and current without a complicated test setup.

### Supplemental characteristics for all model numbers

**DC floating voltage:** Output terminals can be floated up to  $\pm 240$  VDC maximum from chassis ground

**Remote sensing:** Up to two volts dropped in each load lead. Add 2 mV to the voltage load regulation specification for each one volt change in the positive output lead due to load current change.

**Command processing time:** Average time required for the output voltage to begin to change following receipt of digital data is 4 ms for the power supplies connected directly to the GPIB.

**Output programming response time:** The rise and fall time (10/90% and 90/10%) of the output voltage is less than 2 ms. The output voltage change settles within 1 LSB (0.025% x rated voltage) of final value in less than 6 ms.

**GPIB interface capabilities:** IEEE-488.2, SCPI command set, and 6610A/B Series programming compatibility

**Input power:** (full load): 1.6 A, 100 W (6611C: 2.2 A, 120 W)
